HANDLE FOR RAILWAY RAILS

The handle can be used for lifting and transportation of following types of railway rails: S49, R50, S54, UIC54, UIC60. A single handle is recommended for transportation of only short sections of rails that are stable. Longer sections should be transported on at least two grippers mounted on the traverse.

The clamping on the rail is self-acting during the lifting

TYPE	A [mm]	B [mm]	C [mm]	H [mm]	WEIGHT [kg]
SZ -0,5	90	170	36	340	4,2
SZ -1,0	90	190	50	360	8,5
